◁ Pitts Special S-1 1991
Origin USA
Engine 180 hp Lycoming AEIO-360 air-cooled flat-4
Top speed 175 mph (282 km/h)

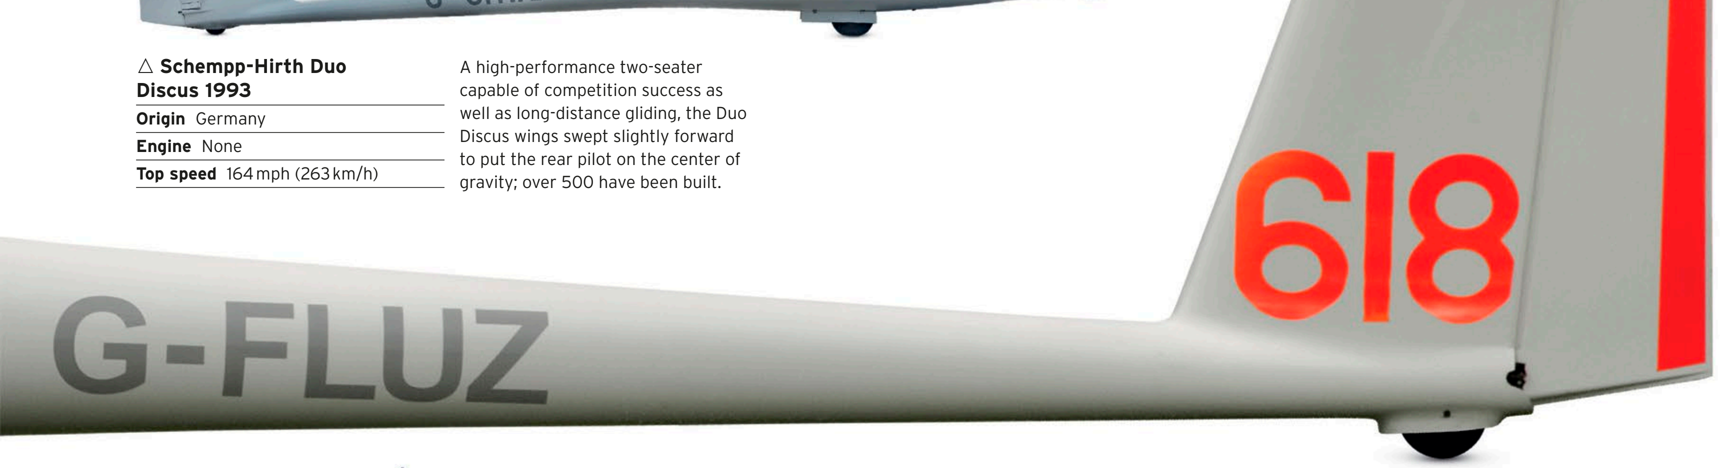
Based on a 1940s design by Curtis Pitts, the S-1 is still a capable aerobatic machine, now built by Aviat Aircraft of Wyoming. Probably the best known aerobatic design, it has won many competitions worldwide.

▽ Rolladen Schneider LS8-18 1994
Origin Germany
Engine None
Top speed 175 mph (281 km/h)

Wolf Lemke regained the lead in glider performance with the LS8, deleting the flaps to achieve a lighter, smoother wing that gave the LS8 championship success, while remaining easy and gentle to fly.

△ Schempp-Hirth Duo Discus 1993
Origin Germany
Engine None
Top speed 164 mph (263 km/h)

A high-performance two-seater capable of competition success as well as long-distance gliding, the Duo Discus wings swept slightly forward to put the rear pilot on the center of gravity; over 500 have been built.



▷ Pegasus Quantum 1996
Origin UK
Engine 50 hp Rotax 503-2V air-cooled 2-cylinder in-line two-stroke
Top speed 78 mph (125 km/h)

The Quantum was aimed upmarket for long-distance touring, with tandem seating. In 1998 it was the first microlight to fly around the world and it won the World Microlight Championships.

△ Pegasus XL-Q 1990
Origin UK
Engine 51 hp Rotax 462 liquid-cooled 2-cylinder in-line 2-stroke
Top speed 80 mph (129 km/h)

With a more powerful liquid-cooled two-stroke engine and new wing, the Pegasus XL became a performance microlight with a high rate of climb and was also suitable for pilot training.

△ Dyn'Aéro MCR01 1996
Origin French
Engine 80 hp Rotax 912 ULS air/water-cooled flat-4
Top speed 186 mph (300 km/h)

Based on a plan-built aircraft designed by Michel Colomban, this two- to four-seat all-composite plane has proved popular for its high speed, but has also been prone to failures.
