

'Mother'

This old American variety, also known as 'American Mother', bears slightly conical yellow-green fruits with red stripes and a soft, yellow, juicy, sweet flesh. It is a slow-growing tree with good scab resistance. Early fruits will store well until the new year.

'Herefordshire Russet'

A relatively new, heavy-cropping variety of exceptional quality, the tree produces golden brown fruits, which are small, but are rich and aromatic. Although they are best eaten fresh, they will store well until the new year.

'Honeycrisp'

Known for the crisp, aromatic flavor that develops when the mottled red fruits ripen on the tree, 'Honeycrisp' is winter-hardy and somewhat resistant to scab and fire blight. It can be harvested over a long period and stores well.
