

'Goldfield'

This climbing French variety puts on an attractive show with its dangling array of yellow pods, and is worth growing in the flower border as it makes a strong focal point. The tasty pods are flat, stringless, and flavorful, and are borne over a long cropping period.

-  unsuitable for containers
-  late spring to midsummer
-  poor resistance
-  not hardy
-  midsummer to mid-fall

'Kentucky Wonder'

This heirloom pole bean, grown by gardeners for over 100 years, produces generous yields of long, round, slightly curved pods beginning about 67 days after sowing. The vigorous vines are resistant to rust and successful in many growing conditions.

-  unsuitable for containers
-  late spring to early summer
-  some resistance
-  not hardy
-  late summer to fall

'Helda'

Growing to 8 ft (2.4 m), 'Helda' begins producing stringless, flat-sided, 9-in (23-cm) pods just two months after sowing, and continues all summer if they are harvested regularly. The vine shows good resistance to Common Mosaic Virus.

-  unsuitable for containers
-  late spring to early summer
-  some resistance
-  not hardy
-  midsummer to fall
