

PROJECT UNIGAUGE

At the time of Independence, India had 25,170 km of broad-gauge (BG), 24,153 km of metre-gauge (MG), and 5,370 km of narrow-gauge (NG) lines. Different gauges hampered the free flow of traffic across the network. In 1992–93, the Ministry of Railways adopted the policy of using the unigauge wherein all gauges were to be converted to BG (5 ft 6 in). By 2017, 20,674 km of MG tracks and 3,161 km of NG tracks, were converted to BG.
