

A 885

Year built 1897

Manufacturer WG Bagnall Ltd, Stafford, UK

Gauge Narrow (2')

Wheel configuration 0-4-0

Named *Hasang*, this locomotive was considered the smallest steam engine ever used in the Indian subcontinent. It was originally manufactured with a 0-4-2 wheel arrangement. The saddle-shaped compartment over its boiler was used to store water. *Hasang* spent most of its working life shunting wagons in the Ledo coal mines in Assam in northeast India.
