

FMA 37302

Year built 1888

Manufacturer M/s Dubs & Co, Glasgow Locomotive Works, Glasgow, UK

Gauge Metre

Wheel configuration 0-6-0

Originally known as the FM 118, this locomotive's classification changed to FMA 37302 after its coal capacity was increased. It was supplied to the Southern Mahratta Railway where it served both passenger and goods trains. Due to this, it was created with more boiler capacity and was designed to withstand higher pressure.
