

Decauville

Year built 1902

Manufacturer WG Bagnall Ltd, Stafford, UK

Gauge Narrow (2'6")

Wheel configuration 2-4-2

This locomotive was built for the Decauville Portable Railway System along the North-West Frontier Province, bordering Afghanistan. It was supplied to the military reserve as one locomotive in a batch of 20, with an inside plate frame, "Bagnall's link" motion valve gear, two cylinders, and a saddle tank. *Decauville* was later employed by the Madras Engineer Group in Bangalore.
