

MSM 15

Year built 1907

Manufacturer Nasmyth, Wilson & Co Ltd, Patricroft, UK

Gauge Broad

Wheel configuration 0-4-0

Named *Phoenix*, this locomotive was used as a rail motor car for a branch line service on the East Indian Railway (EIR). It was built with an inside plate frame, two inside cylinders, "Salter balance" safety valves, and two vertical combination injectors. It had its coach portion removed and was made into a shunting locomotive in 1927.
