

M2 162

Year built 1923

Manufacturer Ajmer Locomotive Workshop

Power Steam

Gauge Metre

Wheel configuration 4-4-0

This is the only locomotive in India to have the Joy valve gear, which helps correct inequalities while in motion. It has inside cylinders, a feature rarely seen on metre-gauge engines. Also called the *Duchess of York*, it worked the Rajputana Malwa Railway, where it hauled mail trains, and on the Bombay, Baroda, and Central India (BB&CI) Railway. It was retired in 1970.
