

P-31652

Year built 1922

Manufacturer Ajmer Locomotive Workshop

Power Steam

Gauge Metre

Wheel Configuration 4-6-0

Equipped with the Walschaerts valve gear, used to regulate the flow of steam and an inside plate frame, this BESA design locomotive hauled express service on the Rajputana Malwa Railway in the west. It was originally built with 54" driving wheels. Later, it was modified with 57" wheels in order to accommodate higher speed passenger traffic.
