

WCP 1

Year built 1930

Manufacturer Swiss Locomotive and Machine Works, Switzerland

Power Electric

Gauge Broad

Wheel configuration 1-Co-2

Also known as *Sir Roger Lumley*, named after the governor of Bombay from 1937–43 and originally classified as EA1, this locomotive could run at a speed of 120 km/h in 1930. It marked the introduction of high-speed trains in the Indian subcontinent. The engine was employed to haul passenger trains along the Bombay–Poona and Bombay–Manmad lines in modern-day Maharashtra.
