

XGM 911

Year built 1936

Manufacturer Beyer, Peacock and Co., Manchester, UK

Power Steam

Gauge Broad

Wheel configuration 0-8-0

This locomotive was fitted with two outside cylinders, an inside plate frame, three Ross pop valves, which prevented leaking of steam, and a Walschaerts valve gear (see [Locomotives](#)). It did railway yard shunting in the North Western Railway and for the Eastern Punjab Railway that ran in India's Punjab after Independence. It was rebuilt in the Mughalpura Workshop in Lahore in 1943 where its wheel arrangement was changed to 2-8-2.
