

became more and more obsolete, and some have since been relegated to museums. One is housed in the National Rail Museum in New Delhi and a metre-gauge variant is exhibited at the rail museum in Tinsukia, Assam. Another one was restored in 2008 and is now in working order at Kharagpur.

▲ **The magnificent Beyer-Garratt of the BNR** draws into a station in this painting, dated back to the late 1930s. More than 50 per cent of the challenging BNR line consisted of steep gradients. The powerful Garratts were also used quite successfully on the North Western Railway and the Assam Bengal Railway.
