

lines, railway electrification, establishment of production facilities, and testing telecommunication systems. It has also expanded its operations to include other transportation facilities and infrastructure development. It established the Rail Coach Factory (RCF) in Kapurthala, Punjab, and provided services to countries, such as Malaysia, Sri Lanka, and Saudi Arabia.

▲ **RITES** has been a consultant in many metro projects, such as the Bangalore Metro Rail Corporation (BMRC).

CONCOR

The Container Corporation of India Ltd (CONCOR), a Navratna CPSE under the Ministry of Railways, handles multimodal logistical support (road and rail) of domestic and international cargo from the production centres or ports to consumption points. It does so by operating terminals of various kinds. It started with seven inland container depots or “dry ports” established in the interiors, which now number 84. It also owns 15,303 wagons, 30,157 owned and leased containers, 111 reach stackers, and 16 gantry cranes. It manages air cargo complexes and provides value-added services, such as warehousing at the terminals. With an aim to support the country’s increasing trade, it has embraced technology. From the VSAT-based network, the Terminal Management System for Domestic (DTMS) and Export Import (ETMS) to E-Office and Oracle ERP, CONCOR has continued to move with the times.

It runs double stack container trains from Khatuwas terminal (Rajasthan) to the Mumbai port and has also ventured into coastal shipping. Its services from Kandla Port to Tuticorin have been key in the
