

WDM-2

Year Introduced 1962

Manufacturer American Locomotive Company (ALCO); Diesel Locomotive Works (DLW)

Power Diesel-electric

Gauge Broad

Wheel arrangement Co-Co

In 1958, the Indian Railways bought 100 WDM-1 class locomotives from the ALCO, primarily for coal transportation on the Eastern and South Eastern Railways. They soon became inadequate for freight transportation. The Indian Railways were keen to manufacture locomotives based on technology transfer from a foreign manufacturer. After the establishment of the DLW, these were assembled from kits sent by the ALCO. This class was so successful that some locomotives were also exported to Bangladesh and Sri Lanka.
