

YDM-1

Year Introduced 1955

Manufacturer North British Locomotive Company, Glasgow, UK

Power Diesel (Hydraulic transmission)

Gauge Metre

Wheel Arrangement B-B

The first diesel locomotives to haul main-line trains in India, they were used for freight operations around Gandhidham, Gujarat, on the Western Railway, where there was no provision of water for steam locomotives. Later, they ran on some parts of the South Central Railway. Weighing 44 tonnes, they could run at 88 km/h. They were phased out of service at the end of the 20th century. They are preserved at the Regional Rail Museum, Chennai and the National Rail Museum, New Delhi.
