

YAM-1

Year Introduced 1964

Manufacturer Mitsubishi, Japan

Power DC Electric

Gauge Metre

Wheel arrangement B-B

This class of locomotives worked on the Southern Railway line in the Chennai region, especially on the section between Tambaram and Villupuram. They were withdrawn from service in 2004 after gauge conversion. Weighing 52 tonnes and with a power output of 1,740 HP, they could run at 80 km/h. In all, 20 units, numbered 21904–21923, were imported. While most locomotives are stationed at Tambaram, locomotive number 21912 is with the CLW.
