

WAM-4

Year Introduced 1970

Manufacturer Chittaranjan Locomotive Works

Power AC Electric

Gauge Broad

Wheel Arrangement Co-Co

Fondly called “The Old Monk”, this class is the first locally designed and built electric locomotive in the country. With 3,850 HP, these could attain a speed of 120 km/h. Till the mid-1980s, WAM-4 engines were the mainstay of passenger service in the Indian Railways. Many locomotives, such as WCM-1, WCG-2, and even some WAPs, were inspired by this class.
