

## **FLOOR ON FLOOR**

Similar to double-decker buses, the Double Decker Express has two floors of accommodation and can thus cater to far more passengers than other trains. The first double-decker train ran between Howrah in West Bengal and Dhanbad in Jharkhand in 2011. These air-conditioned trains usually run on shorter routes, such as Jaipur–New Delhi, Mumbai–Ahmedabad, and Chennai–Bengaluru. One of the fast train services in Indian Railways, these are given high priority on the network.
