

FAST AND FURIOUS

The Tejas Express was introduced as the first semi-high speed train service in India. Though capable of running at 180 km/h, its operational speed is restricted to a maximum of 130 km/h. The first train ran between Mumbai and Goa in May 2017. This fully air-conditioned train service has modern facilities, such as LED TVs, bio-vacuum toilets, and Wi-Fi connections. The Lucknow–New Delhi Tejas Express is the first train to be operated independently by the IRCTC, followed by a second one between Mumbai and Ahmedabad.
