

# Types of aircraft

## Military

Twin tail fins

Fighter/strike aircraft, McDonnell Douglas F/A-18E Super Hornet

Harrier can take off and land vertically.

Naval strike aircraft, McDonnell Douglas AV-8B Harrier II

Wings fold back for supersonic flight.

Swing-wing bomber, General Dynamics F-111A Aardvark

The A-10's huge array of weapons gives it a massive firepower.

Ground-attack "tankbuster" aircraft, Fairchild A-10 Thunderbolt II

Radar dome

Refuelling/electronic counter-measures aircraft, Boeing EC-135 Stratotanker

Hinged nose is raised to allow loading.

Heavy transport aircraft, Lockheed C-5A Galaxy - one of the world's largest aircraft

Twin propellers

Radar bulge

Radar aircraft, Fairchild Gannet AEW-3, gives early warning of air attacks.

Extended wings for high-altitude flight.

High-level reconnaissance aircraft, Lockheed U-2

777's engines are the most powerful aircraft engines ever built.

Wide-bodied, long-haul airliner, Boeing 777-200

737 is the world's best-selling jet airliner.

Medium-range airliner, Boeing 737-300

Low-noise engines

Short-range airliner, British Aerospace Bae 146-RJ85

More than 1,800 727s were built.

Freight transporter aircraft, Boeing 727

Seating for 8-14 passengers

Business jet, British Aerospace Bae 125-600

Turbo-prop engines

Commuter aircraft, Fairchild Metro II

Single engine

Leisure aircraft, SOCATA TB-20 Trinidad

Rear-mounted engines

Flying boat, Beriev A-50 Mermaid

Wing float

## Helicopters

Wings carry armaments such as rockets and guns.

Attack helicopter, Bell AH-1 Cobra

Five-bladed main rotor

Passenger helicopter, Sikorsky S-61

Tail rotor

Transport helicopter, Boeing CH-47 Chinook

Twin rotors

Osprey can fly like both a helicopter and a plane.

Tilt-rotor aircraft, Boeing V-22 Osprey

Rotors can tilt 90°.

Glider soars on warm air currents.

Hang-glider is like a huge wing with a harness below to hold the pilot.

Fabric-covered wings and fuselage

Biplane training/leisure aircraft, De Havilland Tiger Moth DH8A

## Sport

Wing of light woven fabric over metal frame

Propeller

Motor

Hand grip

Wheels allow microlight to take off and land like a normal aircraft.

Microlight is a kind of motorized hang-glider, with a strong frame and a streamlined fibreglass "tricycle" underneath to carry the pilot.
