

Architecture

Gothic, Renaissance, and Baroque

Notre Dame, Paris, France:
built from 1163 to 1250.

Carved
stone
lantern

Magnificent
Gothic
cathedral

Two lions
flank the
entrance.

Palacio de las Cadenas, Ubuda, Spain: built during the mid-16th century.
The Classical facade shows the elegance of Renaissance buildings.

St. Paul's Cathedral, London,
Britain: built in the Baroque style.

Capilla del Salvador, Ubuda, Spain: one of
Spain's finest Renaissance churches, it was
designed by three 16th-century architects.

Carved
stone
figures

St. Peter's, Rome, Italy, took over a century to build (1506–1614).
It involved all the great architects of the Roman Renaissance
and Baroque, including Michelangelo Buonarroti (1475–1564).

Ribbed dome
designed by
Michelangelo

Facade by
Carlo Maderno
(c. 1556–1629)

135 spires
crown the
roof.

Milan Cathedral, Italy, is one of the largest Gothic
churches in the world. Building began in the 14th
century, but was not completed for 500 years.

Modern architecture

Windows give
the effect of glass
curtains.

Two towers,
linked by
means of a
central
atrium.

Framework

Bauhaus Building, Dessau, Germany:
built from steel and concrete in the
International Modern Style (1925–26).

Arched
sunburst,
typical of
1920s' style
known as
"Art Deco"

Designed
in 1942,
completed
in 1960

Spire of the Chrysler Building,
an office block in New York,
USA (completed 1930).
