

Password Picker

Passwords stop other people from accessing our computers, personal emails, and website login details. In this project, you'll build a tool that makes secure, memorable passwords to help keep your private information safe.

▷ Password tips

A good password is easy to remember but hard for a person or a password cracker to guess.

A name is easy to remember, but it wouldn't be difficult to guess.

This password could take a hacker over 1,000 years to crack, but it's hardly memorable.

What happens

Password Picker will enable you to create strong passwords by combining words, numbers, and characters. When you run the program, it will create a new password and show it on the screen. You can ask it to keep creating new passwords until you find one you like.

This password looks complicated, but it could take a cracker less than 2 seconds to guess.

This is secure but easy to remember. Just think of two tired dinosaurs going to bed! It could take a cracker over a million years to guess this password correctly.

LINGO

Password cracker

A cracker is a program used by hackers to guess passwords. Some crackers can make millions of guesses every second. A cracker usually starts by guessing commonly used words and names. An unusual password made up of several different parts will help protect against crackers.
