

8 Draw the arms

Each arm is drawn in two parts: first the upper arm, from the robot's shoulder to its elbow; then the lower arm, from the elbow to the wrist. Type this below the code you added in Step 7, then run it to see the arms appear.

Upper left arm

```
# arms
t.goto(-150, 70)
rectangle(60, 15, 'grey')
t.goto(-150, 110)
rectangle(15, 40, 'grey')

t.goto(10, 70)
rectangle(60, 15, 'grey')
t.goto(55, 110)
rectangle(15, 40, 'grey')
```

Upper right arm

Lower right arm

Lower left arm

9 Draw the neck

Time to give your robot a neck. Type these neck-drawing commands below the code you added in Step 8.

```
# neck
t.goto(-50, 120)
rectangle(15, 20, 'grey')
```

10 Draw the head

Oops – you've drawn a headless robot! To give your poor robot a head, type these commands below the code you added in Step 9.

```
# head
t.goto(-85, 170)
rectangle(80, 50, 'red')
```

Don't forget to save your work.
