

SUPPLY CARRIER

This Junkers Ju 52/3m (right) drops supplies via parachute during the German invasion of Norway in April 1940.

**SOLID ENGINE**

Two engineers carry out essential maintenance on one of the Ju 52/3m's BMW radial engines – one of the secrets of the its famed reliability.

**NOISY FLIGHT**

The Junkers Ju 52/3m was a very noisy aircraft to fly. While the din was unpleasant for the troops or passengers in the cabin, it was worse for the pilots, who were closer to the plane's three engines.

Deep, high-lift wing section

Closely cowled BMW radial engine

Metal two-blade propeller

VERSATILE CRAFT

The rugged Junkers Ju 52/3m was used in various ways, including airliner, freighter, troop carrier, bomber, mine-countermeasures, glider tug, and ambulance.

Auxiliary flying surface, incorporating ailerons and flaps

Townend ring

Flat windshield panels

Cargo door (behind wing)

Slotted aileron

COMMON CHARACTERISTICS

This reconditioned Junkers Ju 52/3m, now flown for nostalgic pleasure rides, exhibits many of the features typical of the Junkers line, including a corrugated alloy skin, fixed undercarriage, and slotted ailerons.

Rugged, fixed landing gear allows operation from rough ground

Specifications

ENGINE 3 x 830hp BMW 132T radial
