

Boeing 777-300

Designed to fit in passenger capacity between the Boeing 767 and the renowned 747, the 777 program was announced in October 1990. The design featured many firsts. It was the first airliner to be digitally designed using 3-D computer graphics, eliminating the need for a costly, full-scale mock-up; and the first Boeing product to have fly-by-wire flight controls and an advanced computerized cockpit. The first of the 777 family, the 777-200, went into service in July 1995. The stretched 777-300 version followed in 1998.

ENGINE 2 x 84,000lbt (38,140kpg) Rolls-Royce Trent 884 turbofan	
WINGSPAN 199ft 11in (60.9m)	LENGTH 242ft 4in (73.9m)
CRUISING SPEED 564mph (905kph)	
PASSENGERS 368–550	CREW 2

Douglas DC-10-30

The last in the line of Douglas Commercials, the tri-jet DC-10 entered service with both American and United Airlines in August 1971. Despite being in direct competition with the Lockheed TriStar, and early catastrophic accidents, the DC-10, particularly the longer-range-30 version, was the more successful of the two. When production ended in 1989, 386 civil DC-10 had been built plus 60 military KC-10 tanker transports for the USAF. The design evolved into the MD-11.

ENGINE 3 x 52,500lbt (23,840kpg) General Electric CF6-C1	
WINGSPAN 165ft 5in (50.4m)	LENGTH 182ft 1in (55.5m)
CRUISING SPEED 610mph (982kph)	
PASSENGERS 250–380	CREW 3

Fokker F.50

Building on the outstanding success of the F.27, Fokker announced the F.50 in November 1983. Although based on the F.27-500 fuselage, the design had new engines, advanced six-bladed propellers, a computerized cockpit, and other improvements. In March 1996, Fokker collapsed due to financial problems, after some 220 F.50s had been delivered or were on order.

ENGINE 2 x 2,250shp Pratt & Whitney PW 125B turboprop	
WINGSPAN 95ft 2in (29m)	LENGTH 82ft 19in (25.3m)
CRUISING SPEED 331mph (532kph)	
PASSENGERS 58	CREW 4

Ilyushin Il-96M

Although resembling the earlier Il-86, the Il-96 was virtually a new design which first flew in September 1988. Equipped with Soloviev PS-90 turbofans, some 15 were built before the appearance of the Il-96M in 1993. With a stretched fuselage, western computerized avionics, and American engines, the new variant also came in an Il-96T freight version. Despite this attempt to widen the commercial appeal, the Il-96 failed to achieve a breakthrough into mass production. Russian airlines preferred to buy from Airbus and Boeing, relegating the homegrown Il-96 largely to government and military use.

ENGINE 4 x 37,000lbt (16,800kpg) P&W PW2337 turbofan	
WINGSPAN 197ft 3in (60.1m)	LENGTH 209ft 9in (63.94m)
CRUISING SPEED 547mph (880kph)	
PASSENGERS 312–375	CREW 2

Lockheed L-1011-500 TriStar

The last Lockheed airliner, the TriStar would lose out to its DC-10 rival because of the choice of Rolls-Royce engines. The development costs of the highly advanced RB211 engine bankrupted Rolls-Royce in 1971, just four months after the L-1011's first flight in November 1970. With the RB211's technical and financial problems overcome, the TriStar joined Eastern and TWA in April 1972. Despite introduction of the longer-range -500 version, total production was limited to 250.

ENGINE 3 x 50,000lbt (22,700kpg) R-R RB211-524 turbofan	
WINGSPAN 164ft 4in (50.1m)	LENGTH 164ft 3in (50.1m)
CRUISING SPEED 597mph (960kph)	
PASSENGERS 246–330	CREW 3

McDonnell Douglas MD-11

Following the merger of McDonnell and Douglas, the DC-10 was relaunched in December 1986 as the modernized, stretched, and re-engined MD-11. Offered as a passenger airliner, a freighter, or combination of both, the first MD-11 was delivered in December 1990. Production continued until 2000, by which time 200 had been manufactured, mostly operated as freighters.

ENGINE 3 x 60,000lbt (27,240kpg) P&W PW4460 turbofan	
WINGSPAN 169ft 6in (51.7m)	LENGTH 200ft 10in (61.2m)
CRUISING SPEED 588mph (945kph)	
PASSENGERS 323–405	CREW 2

McDonnell Douglas MD-87

The original DC-9 Series 10 of 1965 became the DC-9 Series 80 by 1977, and then the MD-80 series in 1983, following the McDonnell merger. It was very successful with over 1,400 delivered by December 1999. The MD-80-87, abbreviated to just MD-87, featured a shortened fuselage. The MD-90 is a re-engined version of the MD-80, the MD-95 variant of which was relaunched as the Boeing 717.

ENGINE 2 x 20,000lbt (9,080kpg) P&W JT8D-217C turbofan	
WINGSPAN 107ft 10in (32.9m)	LENGTH 130ft 5in (39.8m)
CRUISING SPEED 504mph (811kph)	
PASSENGERS 139	CREW 2

Tupolev Tu-154

By the mid-1990s, the Tu-154, with approximately 900 built, was the standard medium-range airliner throughout the former USSR. Designed in the mid-1960s with the ability to operate from the more rural areas of Russia, the first tri-jet 154 flew in October 1968. The improved Tu-154M appeared in 1982, with quieter and more economical engines and continued in production into the 21st century. The type was retired from service by Aeroflot in 2009.

ENGINE 3 x 23,380lbt (10,610kpg) Aviadvigatel turbofan	
WINGSPAN 123ft 3in (37.6m)	LENGTH 157ft 2in (47.9m)
CRUISING SPEED 590mph (950kph)	
PASSENGERS 180	CREW 3–4
