

Gulfstream Aerospace Gulfstream V

The Gulfstream V entered service in 1997 as the fifth generation of long-range corporate transports, which started with the original 1958 Grumman Gulfstream I. This highly successful business jet had a new advanced wing built by Vought Aircraft and highly efficient BMW Rolls-Royce engines, permitting an ultra-long range of 6,750 miles (10,860km). The Gulfstream V was succeeded by the improved Gulfstream 550 introduced in 2004 and the larger, faster Gulfstream 650 from 2009. The longer-range G650ER variant entered service in 2014.

ENGINE 2 x 14,750lbs BMW Rolls-Royce BR710 turbofan	
WINGSPAN 93ft 6in (28.5m)	LENGTH 95ft 5in (29.4m)
CRUISING SPEED 530mph (853kph)	
PASSENGERS 8	CREW 2

Piper PA-18-150 Super Cub

More powerful than any of its predecessors, the Super Cub was the final development of the original 1937 Piper J-3 Cub, first flying in November 1949. When continuous production ended in 1981, nearly 7,500 had been built. The most powerful version, the PA-18-150, first appeared late in 1954. Many thousands of Super Cubs remain in private ownership worldwide.

ENGINE 150hp Lycoming O-320 flat 4	
WINGSPAN 35ft 3in (10.7m)	LENGTH 22ft 6in (6.9m)
CRUISING SPEED 128mph (206kph)	
PASSENGERS 1	CREW 1

Cessna Citation X

The Citation X is a long-range, medium-sized business aircraft, or bizjet. Although based on Cessna's highly successful Citation III, VI, and VII models, the Citation X is significantly different in its wing design, avionics, and engine power. It made its maiden flight in 1993, but was not certified to fly until late 1995. More than 330 have been sold since. The newest Citation X+ is the world's fastest business jet with a cross-continental range.

ENGINES 2 x 6,442lbs thrust Rolls Royce AE 3007C turbofan engines

WINGSPAN 63ft 7in (19.4m)	LENGTH 72ft 4in (22m)
CRUISING SPEED 604mph (972kph)	
PASSENGERS 12	CREW 2

Cirrus SR22

Cirrus have been building aircraft since 1984. Introduced in 2001, the SR22 is one of the world's best-selling single-engine, four-seater aircraft. It is a development of Cirrus's earlier model, the SR20. In 2003 the SR22 became the first aircraft of its kind to have a glass cockpit. In 2009 the SR22 GTS models were equipped with a new enhanced vision system (EVS), a sophisticated dual-wavelength instrument that offers both infrared and synthetic vision.

ENGINE 310hp Continental Motors 10-550 turbocharged air-cooled flat 6 piston

WINGSPAN 38ft 4in (12m)	LENGTH 26ft (7.92m)
CRUISING SPEED 211mph (339kph)	
PASSENGERS 4	CREW 1

Rutan Model 33 Vari-eze

The Rutan Aircraft Factory Inc., formed in 1969 by the two Rutan brothers, Burt and Dick, has produced some incredible aircraft, the most famous being the "around-the-world" Voyager. The first composite-structure, canard (tail-first) Vari-eze appeared in 1975, and was followed by a second prototype a year later. The design, with its retractable nose-wheel and fixed main wheels, achieved an incredible performance on just 100hp. It was immediately successful with home builders such that, by 1984, over 600 had flown and more than 1,400 were under construction.

ENGINE Various, including 100hp Continental O-200 flat 4 piston

WINGSPAN 22ft 3in (6.8m)	LENGTH 14ft 2in (4.3m)
CRUISING SPEED 195mph (313kph)	
PASSENGERS 1	CREW 1

Diamond DA42

Based in Austria and Canada, Diamond Aircraft have been building aircraft that combine innovative airframe technology, advanced avionics systems, and electronically controlled jet fuel piston engines since 1991. It began making diesel aircraft in 2008. The DA42 was the first diesel plane to cross the Atlantic, and in 2010 was the first to fly on algae-derived biofuel.

ENGINES 2 x 168hp Austro AE 300 turbocharged, liquid-cooled 4-cylinder in-line diesel

WINGSPAN 43ft (13m)	LENGTH 28ft (8.56m)
CRUISING SPEED 222mph (357kph)	
PASSENGERS 2	CREW 2

Socata TB10 Tobago

In the mid-1970s, the French company Socata designed a family of four- or five-seat light aircraft to replace its highly successful Rallye. The TB series were all given Caribbean names and ranged from the basic fixed undercarriage TB9 Tampico Club to the turbocharged, retractable gear TB21 Trinidad TC. The first TB10 flew in February 1977 and became the most popular of the range, with a faired, fixed undercarriage and more powerful engine than the basic Tampico.

ENGINE 180hp Textron Lycoming O-360 flat 4 piston engine	
WINGSPAN 32ft (9.8m)	LENGTH 25ft 3in (7.7m)
CRUISING SPEED 150mph (240kph)	
PASSENGERS 3	CREW 1
