

#### ◁ Douglas A-20 Havoc 1941

**Origin** USA

**Engine** 2 x 1,700hp Wright R2600-A win Cyclone supercharged air-cooled 14-cylinder radial

**Top speed** 340 mph (549 km/h)

A favorite of pilots because of its fighterlike handling, this light bomber was also known as the DB-7 Boston. It doubled as a night-fighter and was operated by many Allied air forces; 7,478 were built.

#### △ Consolidated B-24 Liberator 1941

**Origin** USA

**Engine** 4 x 1,200hp Pratt & Whitney R-1830-65 Twin Wasp turbosupercharged air-cooled 14-cylinder radial

**Top speed** 290 mph (467 km/h)

The B-24 Liberator was lighter, faster, with a greater range and bomb load than the B-17. However, it was also harder to fly and more liable to catch fire or crash if hit. More than 18,400 of this most prolific WWII Allied bomber were built.

#### △ Handley Page Halifax 1940

**Origin** UK

**Engine** 4 x 1,615-1,800hp Bristol Hercules XVI/100 supercharged air-cooled 14-cylinder radial

**Top speed** 282 mph (454 km/h)

First flown in 1939 and progressively uprated from its original Rolls-Royce Merlin to Bristol engines, the Halifax was an effective heavy bomber used widely in WWII. It was later adapted for use as a civilian freighter.

#### ▷ North American B-25 Mitchell 1940

**Origin** USA

**Engine** 2 x 1,700hp Wright R-2600-92 supercharged air-cooled 14-cylinder radial

**Top speed** 272 mph (438 km/h)

Some 9,984 were built, in numerous variants, of this successful medium bomber and ground-attack aircraft. It operated in many arenas of WWII and was used by air forces worldwide until as late as 1979.

#### △ Ilyushin Il-2 "Shturmovik" 1940

**Origin** USSR

**Engine** 1,700hp Mikulin AM-38F supercharged liquid-cooled V12

**Top speed** 257 mph (414 km/h)

Built around a 1,543-lb (700-kg) armored shell that protected the crew, engine, radiator, and fuel tank, the "flying tank" was a pure ground-attack aircraft; more than 36,183 were built.

#### △ Yokosuka D4Y3 Model 33 "Judy" 1940

**Origin** Japan

**Engine** 1,075hp Mitsubishi Kinsei air-cooled 14-cylinder radial

**Top speed** 342 mph (550 km/h)

A carrier-based aircraft, this was one of the fastest dive bombers of WWII. It was also used for reconnaissance and Kamikaze missions. Development issues delayed production and only 2,038 were constructed.

#### △ Avro Lancaster 1941

**Origin** UK

**Engine** 4 x 1,280hp Rolls-Royce Merlin XX supercharged liquid-cooled V12

**Top speed** 285 mph (460 km/h)

With four Rolls-Royce Merlin engines, the RAF's main heavy bomber had huge capacity. A phenomenally successful night bomber, the Lancaster carried its huge 14,000-lb (6,350-kg) bomb load to targets in Germany and beyond.
