

◁ Mikoyan-Gurevich MiG-17 1951

Origin USSR

Engine 5,046-7,423 lb (2,289-3,367 kg) thrust Klimov VK-1F afterburning turbojet

Top speed 711 mph (1,145 kph)

Developed from the MiG-15, this was one of the most successful transonic fighters. It was still effective in the 1960s thanks to the addition of an afterburner; China built some from 1966 to 1986.

△ Supermarine Attacker F.1 1951

Origin UK

Engine 5,000 lb (2,268 kg) thrust Rolls-Royce Nene turbojet

Top speed 590 mph (950 km/h)

Test-flown as a land-based fighter in 1946, the Attacker became the Royal Navy's first jet fighter, but was poorly suited to carrier use due to its tail-wheel undercarriage: 185 were built.

▽ Armstrong Whitworth Sea Hawk 1953

Origin UK

Engine 5,200 lb (2,359 kg) thrust Rolls-Royce Nene 103 turbojet

Top speed 600 mph (965 km/h)

Hawker's first jet flew in prototype form in 1947. It was adapted with folding wings for the Royal Navy for carrier launching, commencing service in 1953 and performing well in the Suez crisis.

◁ Supermarine Scimitar F.1 1957

Origin UK

Engine 2 x 11,250 lb (5,103 kg) thrust Rolls-Royce Avon 202 turbojet

Top speed 736 mph (1,185 km/h)

This large twin-engined naval fighter was really too big for the Royal Navy's aircraft carriers and suffered many mechanical problems: more than half of the 76 built were lost in accidents.

▷ Hawker Hunter F Mk1 1954

Origin UK

Engine 7,600 lb (3,447 kg) thrust Rolls-Royce Avon 113 turbojet

Top speed 702 mph (1,130 km/h)

Sydney Camm's Hunter was one of the best and longest-serving early jet fighters, aided by its compact Rolls-Royce Avon engine. First flown in 1951, the prototype set a world air speed record in 1953 of 727 mph (1,170 km/h).

◁ Folland Gnat F1 1955

Origin UK

Engine 4,705 lb (2,134 kg) thrust Bristol Orpheus 701 turbojet

Top speed 695 mph (1,120 km/h)

Designed as a lightweight fighter, "Teddy" Petter's single-seat F1 was sold to India, Finland, and Yugoslavia. The RAF ordered two-seat T1 trainers. They were used by their Red Arrows aerobatic team.

▷ Gloster Javelin FAW.5 1956

Origin UK

Engine 2 x 8,300 lb (3,765 kg) thrust Armstrong Siddeley Sapphire SA.6 turbojet

Top speed 704 mph (1,133 km/h)

With broad delta wings and a large finned "T" tail, this distinctive all-weather interceptor first flew in 1951. After lengthy development to overcome stall issues, it served with the RAF from 1956 to 1968.
