

△ **Bristol Sycamore
HR14 1953**

Origin UK

Engine 520 hp Alvis Leonides 173
9-cylinder

Top speed 127 mph (204 km/h)

The HR14 was the first British-designed commercial helicopter. A total of 177 were built, including 85 HR14s for the RAF, before production ceased in 1959. Its crews pioneered search and rescue and medical evacuation techniques.

◁ **Sud-Ouest SO 1221S Djinn 1953**

Origin France

Engine 240 hp Turbomeca Palouste IV
turbo-compressor

Top speed 81 mph (130 km/h)

Powered by cold, compressed air fed to nozzles on the tips of the rotor blades, the Djinn's directional control was achieved via a "rudder" positioned in the jet efflux.

◁ **Bell 47 G 1953**

Origin USA

Engine 280 hp Lycoming O-540

Top speed 105 mph (169 km/h)

In production for 21 years, the Bell 47 G was manufactured under licence in Italy, Japan, and the UK. In all, 6,221 Bell 47s were built.

▷ **Saro Skeeter Mk 7A
(AOP-12) 1956**

Origin UK

Engine 215 hp de Havilland
Gipsy Major

Top speed 101 mph (162 km/h)

A Cierva design inherited by Saunders Roe, the Skeeter suffered major development problems; 64 examples of its 12th incarnation were bought by the British Army and designated AOP-12.

◁ **Brantly B2 1959**

Origin USA

Engine 180 hp Lycoming IVO 360 A

Top speed 100 mph (161 km/h)

Knitting machine inventor Newby O. Brantly designed the B2 in 1953 as personal transport, although it was not certificated until 1959. The more capable B2-B followed in 1963.
