

▷ **Bolkow BO-208C Junior 1966**

Origin Sweden/Germany
Engine 100 hp Continental O-200 air-cooled flat-4
Top speed 100 mph (160 km/h)

This Swedish design was built in Germany, although a primary trainer of the Swedish version (the Malmö MFI-9) saw combat during the Biafran War, where it was fitted with rocket launchers and flown by mercenaries.

◁ **Schleicher ASK 13 1966**

Origin Germany
Engine None
Top speed 125 mph (201 km/h)

One of the most popular glider trainers ever made, the ASK-13 remains the backbone of many gliding clubs' fleets. Its rugged fabric-covered steel tube fuselage and wooden wings ensure easy repair of minor damage.

△ **Glasflugel H201B Standard Libelle 1967**

Origin Germany
Engine None
Top speed 160 mph (250 km/h)

An early composite Standard Class sailplane, the Libelle was particularly popular with pilots because it was very light and easy to rig. However, although both the handling and performance were good, it was under-braked, which made landing in small fields challenging.

△ **Lake LA-4 1967**

Origin USA
Engine 200 hp Lycoming O-360 air-cooled flat-4
Top speed 150 mph (241 km/h)

Commonly referred to as the Buccaneer, the LA-4 amphibian features a tricycle undercarriage carried within a single-step hull. The pylon-mounted "pusher" configuration was chosen to prevent spray from causing damage to the prop.

◁ **CEA DR-221 Dauphin 1968**

Origin France
Engine 115 hp Lycoming O-235 air-cooled flat-4
Top speed 137 mph (220 km/h)

The Dauphin used the very efficient cranked wing, which was first seen on the Jodel series of homebuilts. Originally a taildragger, the basic design evolved into the tricycle undercarriage DR400.

▷ **Beagle B-121 Pup Series 2 1969**

Origin UK
Engine 150 hp Lycoming O-320 air-cooled flat-4
Top speed 105 mph (169 km/h)

Although the original 100 hp Pup was woefully underpowered, increasing the power available by 50 percent transformed it into a fine light aircraft. Unfortunately, at one point Beagle were selling them at below cost, and the company went into receivership after barely 150 had been produced.

◁ **Morane-Saulnier Rallye 180T Galérien 1969**

Origin France
Engine 180 hp Lycoming O-360 air-cooled flat-4
Top speed 135 mph (217 km/h)

Produced by French airframer Morane-Saulnier, the Galérien is a dedicated glider-tug version of the MS880 Rallye. An unusual feature of the Rallye series is the leading edge slats. These give the type excellent short takeoff and landing (STOL) characteristics.
