

△ Grumman Gulfstream GII 1966

Origin USA

Engine 2 x 11,400 lb (5,171 kg) thrust
Rolls-Royce Spey RB.168
Mk511-8 turbofan

Top speed 581 mph (936 km/h)

Grumman joined the business jet market with the state-of-the-art Gulfstream GII, using greater sweep angles on its wings than its competitors to achieve higher top speeds. The aircraft was chosen by NASA and other organizations for special missions.

△ Hamburger Flugzeugbau HFB-320 Hansa 1964

Origin Germany

Engine 2 x 2,950 lb (1,338 kg) thrust
General Electric CJ610-5 turbojet

Top speed 513 mph (825 km/h)

This was the only civilian jet with a forward-swept wing (so the wing spar passed through the cabin behind the main seating area). Most of the 47 built went to the Luftwaffe for training and VIP transport.

△ Learjet 25 1966

Origin USA

Engine 2 x 2,950 lb (1,338 kg) thrust
General Electric CJ610-6 turbojet

Top speed 534 mph (859 km/h)

Learjet simply stretched the successful 23/24 series to make an eight- to ten-seat business jet. The Learjet 25 has the marque's distinctive wing-tip tanks for its extended range of 1,767 miles (2,844 km); it can fly at up to 45,000 ft (13,716 m).

△ Canadair CL-215 1967

Origin Canada

Engine 2 x 2,100 hp Pratt & Whitney
R-2800-83AM 18-cylinder radial

Top speed 181 mph (291 km/h)

Although also sold for passenger transport, the CL-215 was designed as a fire-fighting aircraft, scooping up to 1,412 gallons (6,419 liters) of water (or filled with 6 tons of chemicals) to drop on forest fires.

▷ Cessna Citation I 1969

Origin USA

Engine 2 x 2,200 lb (997 kg) thrust Pratt
& Whitney Canada JT15D-1B turbofan

Top speed 465 mph (749 km/h)

Cessna's ultimately successful bizjet series got off to a shaky start with the Citation I, which was slower than its rivals and required one more crew member than competing turboprops.
