

△ Mikoyan-Gurevich MiG-21 PF 1960

Origin USSR

Engine 8,380-14,550 lb (3,796-6,591 kg) thrust Tumansky R-13-300 afterburning turbojet

Top speed 1,385 mph (2,230 km/h)

The most-produced supersonic aircraft ever, and operated by 50 countries, is an extremely effective light fighter-interceptor, also used for reconnaissance. More than 10,000 have been built. Its weaknesses were range and agility.

△ Convair B-58 Hustler 1960

Origin USA

Engine 4 x 15,020 lb (6,804 kg) thrust General Electric J79-GE-5A/B/C afterburning turbojet

Top speed 1,319 mph (2,123 km/h)

This ambitious delta-wing Mach 2-capable supersonic nuclear bomber boasted many of the latest advances in technology, but accurate surface-to-air missiles made it highly vulnerable.

△ Aero L-29 Delfin 1961

Origin Czechoslovakia

Engine 1,960 lb (888 kg) thrust Motorlet M-701C 500 turbojet

Top speed 407 mph (655 km/h)

Czechoslovakia's first locally designed and built jet aircraft was a tandem-seat trainer for all Eastern Bloc countries. Simple, rugged, and easy to fly, it earned an excellent safety record.

▽ Douglas EA-1F Skyraider 1962

Origin USA

Engine 2,700 hp Wright R-3350-26WA supercharged air-cooled 18-cylinder radial

Top speed 322 mph (518 km/h)

First designed during WWII, Skyraiders continued to be recommissioned and serve with distinction into the 1960s and beyond. They were used on the front line as carrier-borne attack aircraft in Vietnam.

◁ Douglas A-4 Skyhawk 1962

Origin USA

Engine 8,200 lb (3,715 kg) thrust Wright J65 or 8,400-9,300 lb (3,805-4,213 kg) thrust Pratt & Whitney J52 turbojet

Top speed 673 mph (1,077 km/h)

Although a 1950s design, the ultra-light Skyhawk was flying well into the 1960s and beyond. It served with distinction as a fighter and ground attack in Vietnam, Yom Kippur, and Falklands wars.

▷ de Havilland FAW2 Sea Vixen 1966

Origin UK

Engine 2 x 11,000 lb (4,983 kg) thrust Rolls-Royce Avon Mk.208 turbojet

Top speed 690 mph (1,110 km/h)

Developed during the 1950s, when it proved exceptionally fast, the Vixen was updated to this FAW2 spec in 1962. Equipped with missiles, rockets, and bombs, it was an effective seaborne fighter.

▽ Cessna O-2 Skymaster 1967

Origin USA

Engine 2 x 210 hp Continental IO-360-D air-cooled flat-6

Top speed 200 mph (322 km/h)

Based on the civilian Skymaster, the O-2's low-cost twin-engine configuration was ideal for military observation and forward control duties. It was used in the Vietnam War and subsequently up to 2010.
