

SPECIFICATIONS			
Model	McDonnell Douglas F-4 Phantom II, 1960	Engines	2 x 11,905-17,844 lb (5,400-8,094 kg) thrust General Electric J79-GE-17A turbojets
Origin	US	Wingspan	38 ft 4 in (11.7 m)
Production	5,195	Length	63 ft (19.2 m)
Construction	Aluminum alloys, titanium, stainless steel, glass cloth laminate	Range	1,615 miles (2,600 km) ferry range
Maximum weight	61,795 lb (28,030 kg)	Top speed	1,472 mph (2,370 km/h)

Impressive thrust

This very large and heavy fighter-bomber lacked the agility of many enemy aircraft, but its impressive thrust meant that its pilot could engage and disengage from a fight at will.
