

Business and Utility Aircraft

Both established and emerging aircraft-manufacturing nations, such as Brazil and Israel, added to the range of business and utility aircraft in the 1970s, with all types, from piston-engined through turboprop and turbofan to turbojet, playing their own roles in providing air travel and transport, from carrying equipment and people into remote areas to ferrying business people across continents in luxury.

▽ **Aero Spacelines Super Guppy 1970**

Origin USA
Engine 4 x 4,680 hp Allison 501-D22C turboprop
Top speed 288 mph (463 km/h)

Based on the Boeing 377-derived Stratocruiser, the Super Guppy first flew in 1965 and could carry 24.7 tons of outsize cargo: Airbus used four to transport parts from decentralized production.

▷ **Aérospatiale SN 601 Corvette 1972**

Origin France
Engine 2 x 2,500 lb (1,134 kg) thrust Pratt & Whitney Canada JT15D-4 turbofan
Top speed 472 mph (760 km/h)

Designed by the merging Sud and Nord Aviation, this was Aérospatiale's only business jet and it was not a success, with just 40 of all types made by the time the project ended in 1978.

△ **Embraer EMB s110 Bandeirante 1972**

Origin Brazil
Engine 2 x 680 hp Pratt & Whitney Canada PT6A-27 turboprop
Top speed 286 mph (460 km/h)

The Brazilian government commissioned the 110 and created a major new manufacturer, Embraer, to build this successful and reliable general-purpose aircraft with low running costs.

△ **Beechcraft B200 Super King Air 1972**

Origin USA
Engine 2 x 1,015 hp Pratt & Whitney Canada PT6A-41 turboprop
Top speed 339 mph (545 km/h)

With over 3,550 of all variants built in 40 years, this is the longest-production civilian turboprop aircraft in its class. Also popular for military use worldwide, Argentina flew them in the Falklands War.

▷ **Rockwell Sabreliner Model 80A 1973**

Origin USA
Engine 2 x 4,500 lb (2,041 kg) thrust General Electric CF7002D2 turbofan
Top speed 563 mph (906 km/h)

A mid-sized business jet also used for military transport and training, North American's Sabreliner first flew in 1958 and grew progressively in size and power to the ultimate Model 80 of 1973.

△ **Britten-Norman Trislander 1970**

Origin UK
Engine 3 x 260 hp Avco Lycoming O-540-E4C5 air-cooled flat-6
Top speed 167 mph (268 km/h)

Built on the Isle of Wight (and in Romania), John Britten and Desmond Norman enlarged the Islander, increasing its range, to make a versatile, maneuverable, and economical island-hopper.

△ **Dassault Falcon 10 1970**

Origin France
Engine 2 x 3,230 lb (1,465 kg) thrust Garrett TFE731-2 turbofan
Top speed 556 mph (895 km/h)

Dassault scaled down its successful Falcon 20 to make this compact business jet, in practice an all-new design (with similar high-lift wings, but more swept), of which 226 were built in 19 years.

▽ **Ilyushin Il-76 1971**

Origin USSR
Engine 4 x 38,367 lb (17,403 kg) thrust Aviadvigatel PS-90-76 turbofan
Top speed 560 mph (901 km/h)

Built as a heavy freighter to deliver machinery to remote parts of the Soviet Union, the Il-76 can operate from unpaved runways and is used for disaster relief worldwide, as well as for airborne refueling.
