

▷ Deperdussin Type A 1910

Origin France

Engine 35 hp Anzani Y-type air-cooled 3-cylinder

Top speed 60 mph (97 km/h)

Designed by Louis Béchereau for Armand Deperdussin, the Type A was powerful and reliable. It sold in considerable numbers worldwide; some aircraft were also built in England and Russia.

△ Fokker Spin 1910

Origin Holland

Engine 100 hp Argus water-cooled 4-cylinder

Top speed 70 mph (113 km/h)

Holland's first aircraft was Anthony Fokker's Spin (the Dutch word for "Spider"). Despite the first two crashing, Fokker started a factory in Berlin and built 25.

◁ Curtiss Model D 1911

Origin USA

Engine 40 hp Curtiss E4 4-cylinder in-line

Top speed 50 mph (80 km/h)

This versatile "pusher" biplane was designed by Glenn Curtiss, a friend of Alexander Bell. Early examples had a forward elevator; this Mike Beech replica is of the later "headless" form.

△ Blackburn Mercury 1911

Origin UK

Engine 50 hp Isaacson air-cooled 7-cylinder radial

Top speed 60 mph (97 km/h)

Robert Blackburn's two-seat Mercury proved sturdy and effective, with an advanced rotary engine, prompting production of eight Mercury II/III. This nonflying replica was built for a British TV company.

△ Blackburn Monoplane 1912

Origin UK

Engine 50 hp Gnome air-cooled 7-cylinder rotary

Top speed 60 mph (97 km/h)

Blackburn built his first monoplane in Yorkshire in 1909, refining it for this modern-looking model in 1912. Dismantled in 1913 and later rebuilt, it is the oldest airworthy British aircraft.
