

△ **Fairchild Republic A-10 Thunderbolt II 1972**

Origin USA

Engine 2 x 9,065 lb (4,112 kg) thrust General Electric TF34-GE-100 turbofan

Top speed 439 mph (706 km/h)

This close air support aircraft to back up ground troops is heavily armored to protect the pilot, and fitted with a 30-mm rotary cannon to destroy tanks. The US military plan to keep it in service until at least 2028.

△ **Lockheed S-3 Viking 1972**

Origin USA

Engine 2 x 9,275 lb (4,207 kg) thrust General Electric TF34-GE-2 turbofan

Top speed 493 mph (795 km/h)

This carrier-based long-range all-weather aircraft, the Viking was used by the US Navy until 2009 for submarine surveillance, surface warfare, and aerial refueling.

△ **McDonnell Douglas F-15 Eagle 1972**

Origin USA

Engine 2 x 17,450-25,000 lb (7,915-11,340 kg) thrust Pratt & Whitney F100-100/-220 afterburning turbofan

Top speed 1,650+ mph (2,660+ km/h)

The Eagle is a highly successful tactical fighter with over 100 dogfight wins and no losses, as a result of its advanced avionics with immense power and performance. Upgraded, the USAF plans to fly it until 2025.

△ **SEPECAT Jaguar GR MK 1 1973**

Origin UK/France

Engine 2 x 5,115-7,305 lb (2,320-3,313 kg) thrust Rolls-Royce/Turbomeca Adour Mk102 turbofan

Top speed 1,056 mph (1,699 km/h)

A joint French/British project, this successful ground-attack aircraft with nuclear strike ability proved to be very reliable in the Gulf War. It was retired by France and the UK in 2005-07, but it is still in service elsewhere.

△ **General Dynamics F-16 Fighting Falcon 1974**

Origin USA

Engine 17,155-28,600 lb (7,781-12,973 kg) thrust F110-GE-100 afterburning turbofan

Top speed 1,500 mph (2,414 km/h)

Built as an air superiority day fighter for the USAF, this aircraft is still in production (over 4,500 built) as a multirole aircraft. Fast and highly maneuverable, it is one of the first aircraft to use fly-by-wire controls.

△ **Tupolev Tu-22M3 1978**

Origin USSR

Engine 2 x 55,100 lb (24,992 kg) thrust Kuznetsov NK-25 turbofan

Top speed 1,240 mph (2,000 km/h, Mach 1.88)

One of the largest swing-wing aircraft ever, the Tu-22M long-range strategic bomber first flew in 1969. It has been progressively developed and remains in service to this day. This M3 was built in 1978.
