

▷ Enstrom F280C Turbo Shark 1975

Origin USA

Engine 250 hp Lycoming H10-360-1AD piston engine

Top speed 120 mph (193 km/h)

Certified in 1975 the F280C was an aerodynamically refined development of the F28. For private and corporate use, it was fitted with an upgraded turbocharged engine and featured a three-place cabin layout. Production continued until late 1981.

▷ Westland Lynx 1976

Origin UK

Engine 2 x 1,120 shp Rolls-Royce Gem 41-1 turbine

Top speed 175 mph (281 km/h)

The Lynx AH.1/7 is used for anti-tank and troop support operations and the Lynx HAS 2/4/8 for antisubmarine missions. Both were developed through the Anglo-French Lynx program of the 1960s.

◁ Westland Sea King HC4 1979

Origin UK

Engine 2 x 1,660 shp Rolls-Royce Gnome H1400-1 turboshaft

Top speed 129 mph (207 km/h)

The Sea King HC4 is a Sikorsky design built under license by Westland. It was a modified version of the antisubmarine helicopter. Specialized equipment and reduced weight provided space for up to 21 combat-equipped troops with defensive weapons, armor, and sensors.

▷ Aerospatiale AS350 Squirrel HT1 1977

Origin France

Engine 641 shp Turbomeca Arriel 1D1 turboshaft

Top speed 169 mph (272 km/h)

Launched in the early 1970s as a civil five- to six-seat helicopter, the Squirrel was built using new construction methods and composite plastics. Production began in 1977 and it soon found a military market. This HT1 is a British RAF training helicopter.

◁ Aerospatiale AS365 Dauphin 2 1979

Origin France

Engine 2 x 838 hp Turbomeca 2C Arriel turboshaft

Top speed 174 mph (280 km/h)

Designed to replace the Alouette III, the Dauphin began as an eight-seat single-engined machine but in 1975 it was succeeded by a twin-engined version that was further developed into the Dauphin 2.

▷ AS332 Super Puma 1978

Origin France

Engine 2 x 1,742 shp Turbomeca Makila 1A1 turboshaft

Top speed 163 mph (262 km/h)

The runaway success of the decade, the 18-passenger Super Puma has become the helicopter of choice for offshore oil support and a versatile favorite in the military market.

◁ Sikorsky UH-60 Black Hawk 1978

Origin USA

Engine 2 x 1,543 shp GE T700 turboshaft

Top speed 224 mph (360 km/h)

First designed in the mid-1960s, the UH-60A entered production in 1976 and was deployed with the US Army, mainly in an 11-passenger troop configuration. The latest version, the UH-60M, will be produced until 2018.
