

THE EXTERIOR

The MiG-29 (codenamed "Fulcrum" by NATO) has a mid-mounted wing with blended leading-edge root extensions (LERX). The engines are underslung and separated by a large channel. The MiG-29 is immensely strong structurally, and this is apparent in its beefy, almost "agricultural" appearance. The twin vertical tails are a feature inherited from the MiG-25, although while the earlier aircraft design emphasized speed, the MiG-29 design prioritizes agility.

1. Badge on tail 2. ILS aerial fairing 3. Infrared search and track sensor/laser range finder 4. Open cockpit compartment 5. GSh-301 30 mm cannon muzzle apertures 6. Ultra high frequency (UHF) antenna 7. Landing light on leg 8. Air intake 9. White "06" aircraft number 10. Light under wing 11. Landing gear 12. B-8W rocket pod for 20 rounds of 80 mm caliber 13. Underwing attachment for rocket pods 14. Loading area for rocket pod at rear 15. Variable area afterburner nozzle 16. Port rudder
