

◁ Eclipse 500 2002

Origin US

Engine 2 x 900 lb (408 kg) thrust Pratt & Whitney Canada PW610F turbofan

Top speed 425 mph (685 km/h)

The first of the new class of Very Light Jet (VLJ) certified in 2006 the compact, light, six-seat 500 claimed to be "the most efficient jet on the planet." Production was stopped in 2008 but restarted in 2012.

△ Embraer Phenom 100 2007

Origin Brazil

Engine 2 x 1,695 lb (768 kg) thrust Pratt & Whitney Canada PW617-F turboprop

Top speed 449 mph (723 km/h)

Brazil's entry in the VJL market is competitively priced and sells well: more than 380 worldwide by 2020. Simple, easy to operate, and very durable, it boasts 70 percent fewer line checks than its rivals.

△ Cessna Citation Mustang 510 2005

Origin US

Engine 2 x 1,460 lb (662 kg) thrust FADEC Pratt & Whitney Canada PW615F turboprop

Top speed 391 mph (630 km/h)

Classified as a VLJ and therefore accepted for single-pilot operation, the Mustang is a proper business jet in miniature, with aluminum alloy airframe. Production ran to 479 units.

▽ Boeing 787-8 Dreamliner 2009

Origin US

Engine 2 x 64,000 lb (29,030 kg) thrust General Electric GENx or Rolls-Royce Trent 1000

Top speed 593 mph (954 km/h)

Entering service in 2011 with All Nippon Airways, this is Boeing's most efficient airliner and the world's first to be mostly of composite construction. This aircraft also boasts a reduced noise "footprint."

△ SOCATA TBM 850 2006

Origin France

Engine 850 hp Pratt & Whitney Canada PT6A-66D turboprop

Top speed 368 mph (592 km/h)

A collaborative Socata-Mooney design, this top-of-the-range single-engine turboprop is a viable and cost-effective alternative to lower-end business jets and has the Garmin G1000 flight deck.
