

△ Magni Gyroplane M16 2006

Origin Italy

Engine 115 hp Rotax 914 turbo

Top speed 115 mph (185 km/h)

Established for more than 25 years, Magni has developed a reputation for safety and reliability with single-seat gyroplanes and tandem trainers.

▷ Guimbal G2 Cabri 2008

Origin France

Engine 180 hp Lycoming O-360 piston

Top speed 115 mph (185 km/h)

Former Eurocopter engineer Bruno Guimbal's two-seater has been built with backing from his old company to take on the Robinsons in the personal transport market.

◁ Sikorsky S-92 2002

Origin USA

Engine 2 x 2,520 shp General Electric GE CT7-8A turbine

Top speed 190 mph (306 km/h)

A civilian transport manufactured using Black Hawk dynamic components, the S-92 was designed in the 1990s but not produced for 10 years while oil prices were low.

◁ Sikorsky S70i Black Hawk 2011

Origin US design/Polish built

Engine 2 x 2,000 shp General Electric T700-GE-701D turbine

Top speed 183 mph (294 km/h)

This is the latest version of Sikorsky's top-selling Black Hawk built in Poland by PZL Mielec, a company acquired by Sikorsky in 2007, and offered on international markets.

▽ Bell Boeing MV-22B Osprey 2007

Origin USA

Engine 2 x 6,150 shp Rolls-Royce Allison T406/AE 1107C turboshaft

Top speed 316 mph (508 km/h)

A gallant attempt at a hybrid helicopter/fixed wing aircraft, the Osprey's complexity slowed development and massively increased costs; each V-22 works out at \$110 million.

◁ Robinson R66 2011

Origin USA

Engine 300 shp Rolls-Royce RR250-C300 turbine

Top speed 144 mph (232 km/h)

With the R66, Frank Robinson aimed to do for the turbine helicopter market what he did for the piston world with the R22 and R44—cut costs and drive new sales.
