

△ Boeing KC-767A 2003

Origin US

Engine 2 x General Electric CF6-80C2B6F turbofan

Top speed 569 mph (916 km/h)

Based on the 1980s Boeing 767-200, KC-767A was designated in 2002 for military aerial refueling and transport. Italy and Japan took four each, and the US has ordered the latest KC-46 variant.

△ Boeing C-17 Globemaster III 2012

Origin US

Engine 4 x 40,440 lb (18,343 kg) thrust Pratt & Whitney F117-PW-100

Top speed 515 mph (830 km/h)

In 2012, Boeing delivered C-17s to the air forces of the US, UK, and UAE. This brought the total number of this massive, sturdy, long-haul transporter able to operate out of remote airfields to some 220.

▽ Airbus A330 MRTT 2007

Origin Joint European

Engine 2 x 72,000 lb (32,658 kg) thrust Rolls-Royce Trent 772B / General Electric CF6-80E1A4 / Pratt & Whitney PW 4168A turbofan

Top speed 547 mph (880 km/h)

The MRTT (Multi-Role Tanker Transport) is based on commercial A330-200s and can carry airborne refueling equipment, or 380 troops, or 130 standard stretchers. Australia, UK, UAE, and Saudi Arabia have ordered them.

△ Chengdu J-10 2003

Origin China

Engine 25,740 lb (11,675 kg) thrust Lyulka-Saturn AL-31FN turbofan

Top speed 1,632 mph (2,626 km/h, Mach 2.5)

With delta wings and delta-profile canard, the J-10 is highly maneuverable at high speeds. Cloaked in secrecy until 2007, it has a Russian engine. An export variant has been sold to Pakistan.

◁ Northrop Grumman RQ-4 Global Hawk 2000

Origin US

Engine 7,050 lb (3,198 kg) thrust Allison Rolls-Royce AE3007H turbofan

Top speed 404 mph (650 km/h)

This unmanned surveillance aircraft has state-of-the-art radar and camera gear. Able to survey through sandstorm and cloud, the Global Hawk was extensively used in Iran and Afghanistan.

▷ BAE Systems Mantis 2009

Origin UK

Engine 2 x 380 hp Rolls-Royce M250B-17 turboshaft

Top speed 345 mph (555 km/h)

Built to demonstrate and test Unmanned Autonomous Systems, Mantis has 24-hour endurance, flies itself, and plots its own route. It relays observations to its base station via satellites.
