

△ Electravia MC15E Cri-Cri 2010

Origin France

Engine 2 x 25 hp Electravia E-Motor
GMPE-104 electric motor

Top speed 176 mph (283 km/h)

Using two electric motors and 3 kWh lithium-polymer batteries, Hugues Duval set two world records in his diminutive Colombar Cri-Cri, 163 mph (262 km/h) in 2010 and 176 mph (283 km/h) in 2011, at the Paris Air Show.

▷ Schempp-Hirth Arcus-E 2010

Origin Germany

Engine 42 kW Lange electric motor

Top speed N/A

Germany's electric-powered, two-seat, self-launching glider with flaps shares the electric drive technology of the Lange Antares 20E. It is charged by a hangar-mounted Windreich wind turbine.

△ Robin DR400 Ecoflyer 2008

Origin France

Engine 155 hp Thielert Centurion 2.0 turbocharged liquid-cooled 4-cylinder in-line diesel

Top speed 159 mph (256 km/h)

A fabric-covered wood aircraft first flown in 1972, the Robin came up to date with the turbo diesel Ecoflyer option, in 135 hp or 155 hp options, claimed to be far cheaper to run than Avgas engines.

△ Pipistrel Taurus Electro G2 2008

Origin Slovenia

Engine 40 kW electric motor

Top speed 99 mph (159 km/h)

This was the first electric-powered two-seater, with electric motor on a hinged boom for self-launching. It can be transported in a trailer clad in solar panels to charge the batteries, which allows the pilot to fly "for free."

◁ Luxembourg Spécial Aerotechnics MC30E Firefly 2011

Origin Luxembourg

Engine 26 hp Electravia electric motor

Top speed 119 mph (191 km/h)

Like the Electravia, this electric installation is in a Colombar airframe normally fitted with a small gasoline engine. Jean-Luc Soullier's MC30E weighs 249 lb (113 kg) empty, including 4.7 kWh battery pack.

△ Pipistrel Taurus Electro G4 2011

Origin Slovenia

Engine 145 kW electric motor

Top speed 100 mph (161 km/h)

Pipistrel's Taurus won NASA's 2011 Green Flight Challenge (and \$1.35 million) with the only electric-powered four-seater—two G2s linked by a central engine/battery nacelle with a 100 kWh battery pack.
