

▽ **Gulfstream G650 2009**

Origin US

Engine 2 x 16,100 lb (7,303 kg) thrust
Rolls-Royce Deutschland BR725 turbofan

Top speed 610mph (982kph)

Continuing the trend toward ever-greater luxury and refinement, Gulfstream's largest and fastest business jet is equipped with a full kitchen, bar, and range of entertainment features in its oval fuselage. It is still able to land at small airports.

△ **Sukhoi PAK FA 2010**

Origin Russia

Engine 2 x 33,000 lb (14,969 kg) thrust
AL-41F1 afterburning turbofan

Top speed c.1,560 mph (c.2,651 km/h)

Russia's twin-engine multirole stealth fighter first flew in prototype form in 2010 and may enter service in 2015. Composites and titanium alloy are used extensively, with advanced avionics.

▷ **Chengdu J-20 2011**

Origin China

Engine 2 x 30,000-40,000 lb
(13,608-18,144 kg) thrust WS-15
afterburning turbofan

Top speed c.1,430 mph (c.2,300 km/h)

Larger and heavier than US and Russian stealth fighters, China's J-20 has a long, wide fuselage with canard and main delta wings. Its rapid development shows China's determination to catch up.

△ **PC-Aero Elektra One 2011**

Origin Germany

Engine 16 kW electric motor

Top speed 99 mph (159 km/h)

This ultralight with 3- to 4-hour flight time is the first of a series of electric craft with one, two, and four seats, to be charged from solar panels set on the roof of their hangars, as well as on the wings of some models.

▽ **Bell 525 Relentless 2013**

Origin US

Engine 2 x 1800shp General
Electric CT7-2F1 turboshaft

Top speed 161 mph (259 km/h)

Composite construction, fly-by-wire controls, state-of-the-art flight deck, and extensive computerization will make the 525 the most technically advanced helicopter yet.

△ **Sikorsky S97 Raider 2014**

Origin US

Engine c.3000hp General Electric
T700 turboshaft

Top speed 230 mph (370 km/h)

This proposed composite-fuselage, high-speed scout-and-attack army helicopter has a "pusher" propeller as well as main rotors, retractable landing gear, and the potential to fly itself—without a pilot.
