

▽ **Travel Air 4000 1929****Origin** USA**Engine** 300hp Wright J-6
Whirlwind air-cooled
9-cylinder radial**Top speed** 155 mph (250 km/h)

Established in Wichita, Kansas by Clyde Cessna, Walter Beech, and Lloyd Stearman, Travel Air produced some of the most famous biplanes of the 1920s. The 4000 starred as a Wichita Fokker in Hollywood films.

△ **Stearman 4DM Junior 1929****Origin** USA**Engine** 300hp Pratt & Whitney
Wasp Junior air-cooled
9-cylinder radial**Top speed** 158 mph (256 km/h)

Allegedly described by designer Lloyd Stearman as "the best airplane I ever designed," the Stearman Model 4 was an extremely rugged airplane and several different variants were produced, powered by a variety of engines.

◁ **New Standard D-25 1929****Origin** USA**Engine** 220hp Wright J-5
Whirlwind air-cooled
9-cylinder radial**Top speed** 110 mph (176 km/h)

The D-25's wings are arranged in the sesquiplane configuration—the upper wing being much larger than the lower. It was popular with barnstormers for "hopping" joyrides.

△ **Fairchild FC-2 1929****Origin** USA**Engine** 220hp Wright J-5 Whirlwind
air-cooled 9-cylinder radial**Top speed** 122 mph (196 km/h)

Originally designed as a camera aircraft for parent company Fairchild Aerial Surveys, the FC-2 was a rugged, reliable bushplane that was used extensively in the Canadian bush, and also by the Royal Canadian Air Force.

▷ **Waco ASO 1929****Origin** USA**Engine** 220hp Wright J-5 Whirlwind
air-cooled radial**Top speed** 97 mph (156 km/h)

Waco ASO, or the Waco 10, was a handsome three-seat biplane that was popular with barnstormers. It was the most produced Waco biplane, with over 1,600 being made. There were around 17 different versions, all powered by a wide variety of engines, including V8s, and even a diesel.
