

△ Westland Widgeon MkII 1924

Origin UK

Engine 60 hp Armstrong Genet air-cooled 5-cylinder radial

Top speed 104 mph (167 km/h)

The parasol-winged Widgeon was Westland's competitor to the DH60 Gipsy Moth biplane. It was more expensive to produce than its competitors and only 26 (of all Marks) were built.

▷ Ryan M-1 1926

Origin USA

Engine 200 hp Wright J-4 Whirlwind air-cooled 9-cylinder radial

Top speed 125 mph (200 km/h)

The first design by San Diego-based Ryan Aircraft, the M-1 was a parasol design. Although the prototype was fitted with a Hispano-Suiza liquid-cooled V8 of 150 hp, production aircraft were powered by an air-cooled radial.

▽ Zogling 1926

Origin Germany

Engine None

Top speed 80 mph (129 km/h)

Designed by famous aerodynamicist Alexander Lippisch, the Zogling was designed to be bungee launched from slopes and was used for (very) basic glider training.

△ Fairchild 71 1926

Origin USA

Engine 420 hp Pratt & Whitney Wasp air-cooled 9-cylinder radial

Top speed 128 mph (206 km/h)

Developed from the successful FC-2, the Fairchild 71 was slightly larger and had an extra 200 hp. Some were also built in Canada specifically for aerial photography.

◁ Brunner-Winkle Bird Model A-T 1929

Origin USA

Engine 115 hp Milwaukee Tank V-502 liquid-cooled V8

Top speed 105 mph (168 km/h)

Originally powered by a Curtis OX-5, a wide variety of engines powered the Brunner-Winkle Bird, with the most successful version having a Kinner B-5 radial. The Milwaukee engine in this aircraft was derived from the OX-5.

▷ Great Lakes Sports Trainer 1929

Origin USA

Engine 85 hp Cirrus air-cooled in-line 4

Top speed 153 mph (246 km/h)

The Great Lakes won many aerobatic aircraft competitions over several decades. In fact, the basic design was so sound that the type was returned to production in 1973.

◁ Travel Air 4D 1929

Origin USA

Engine 220 hp Wright J-5 Whirlwind air-cooled 9-cylinder radial

Top speed 125 mph (200 km/h)

Popular with the barnstormers who roamed the American Midwest in the 1920s, the Travel Air 4D was a rugged, reliable biplane. It was often used in war films as a "stand-in" for the Fokker D.VII.
