

THE 1980s

Flying became a standard mode of travel, creating a fiercely competitive market. Jets became increasingly sophisticated, and the military revealed stealth planes.

Great Manufacturers: Lockheed	228
Military Aircraft	230
Profile: Mikoyan MiG-29	232
Stealth Bomber	234
Helicopter Developments	238
Great Manufacturers: Robinson	240
A Scattering of British Types	242
Engine: Rotax UL-1V	244
Bizjets and Turboprop Rivals	246
Two-Crew Cockpits	248

THE 1990s

Airliners became bigger than ever before, and the executive-jet market expanded. Military planes took a leap forward with the B-2 Spirit flying wing bomber.

Business and Utility	252
Tradition and Innovation	254
Sports and Sailplanes	256
