

# LOKI

## THE TRICKSTER GOD

Loki is changeable in behaviour and shape. Sometimes he helps the gods, but often he is malicious, deceitful and destructive. His unpredictable nature seems to be driven by his moods and whims rather than any grand plan.

**PARENTS:** Fárbauti and Laufey

**CHILDREN:** Hel, Jörmungandr, Fenrir, Nari, Sleipnir

### SHAPESHIFTER

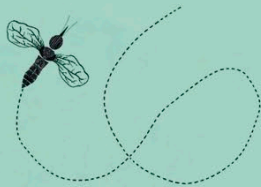

#### FALCON

Loki cannot fly unaided, but with Freya's falcon feathers he can soar and swoop like a bird.

#### SALMON

Odin squeezed Loki when he hid in fish-form – that's why salmon have narrow tails.

#### FLY

Loki can crawl into locked rooms by taking on the shape and size of a fly.

#### MARE

Loki can change sex as well as shape, as he did when he transformed into a female horse.

### TROUBLE-MAKER

Loki uses his shapeshifting expertise to both cause trouble and get himself out of it. However, the other gods usually work out what Loki has been up to and dish out a punishment.
