

The Binding of Fenrir

*Loki was many things, but he was also a father.
With the giantess Angrboda, he had a
monstrous, black-haired wolf called Fenrir.*

The gods knew that the offspring of a giantess and a deceitful trickster like Loki was bound to bring calamity down onto the cosmos, so they kept the wolf pup in Asgard where they could keep an eye on him. Only Tyr, the god of war, had the courage to get close enough to feed him.

Fenrir grew quickly. His fur became thick and spiky, while his claws and teeth were like curved, bladed scimitars. His yellow eyes glowed like twin moons in the dark. Even Thor, the largest of the gods, looked small in Fenrir's shadow.
