

PERENNIAL MEDIUM

Cayenne chili

Capsicum annuum This annual or short-lived perennial produces long, tapering fiery fruits that are packed with seeds. The fruits ripen from green and yellow to red. It is ideal for windowboxes and pots in full sun. Harvest regularly for the best crop.

‡3ft (1m) ↔12in (30cm)

Z9–11

PERENNIAL MEDIUM

Jalapeño chili

Capsicum annuum Producing short, pointed, fleshy-skinned fruits, this annual or short-lived perennial ripens from green to red. It is ideal for containers, pots, and windowboxes in full sun. Harvest regularly for the best crop.

‡3ft (1m) ↔12in (30cm)

Z9–11

PERENNIAL MEDIUM

Sweet pepper

Capsicum annuum This annual or short-lived perennial produces large, yellow, red, orange, and black fleshy summer fruits with a sweet mild flavor. Plant in large containers in full sun. Water and feed regularly; tall varieties may need staking.

‡3ft (1m) ↔18in (45cm)

Z9–11

PERENNIAL MEDIUM

Aji chili

Capsicum baccatum With a mild fruity flavor, this annual or short-lived perennial ripens through various colors in summer, although it can be picked at any stage once large enough. Grow in full sun in large pots. Water regularly; stake tall plants.

‡3ft (1m) ↔18in (45cm)

Z9–11

PERENNIAL MEDIUM

Scotch bonnet chili

Capsicum chinense An annual or short-lived perennial, this extremely hot chili pepper bears flattened, rounded green, yellow, and red summer fruits. Best in warmer areas with long summers. Plant it in containers in full sun. Water regularly.

‡↔3ft (1m)

Z9–11

TREE SMALL

Lemon

Citrus x limon This evergreen tree has glossy green leaves. In spring, it produces fragrant white blooms followed by fruits, which take up to a year to ripen. Feed the plant well while in flower and fruit. Move it indoor in areas with cold winters.

‡10ft (3m) ↔6ft (2m)

Z9–11

ANNUAL/BIENNIAL SMALL

Cilantro

Coriandrum sativum A quick-growing annual herb with rounded, green aromatic leaves. Grown from seed, the whole plant can be used in cooking. Grow in containers and windowboxes. Best in cool areas and well watered.

‡20in (50cm) ↔8in (20cm)

ANNUAL/BIENNIAL MEDIUM

Zucchini

Cucurbita pepo This plant produces a mound of leaves below which the bright yellow flowers and green fruits develop in summer. Harvest the fruits while young and tender. Ideal for growing bags and pots; water and feed the plant well.

‡↔24in (60cm)

ANNUAL/BIENNIAL MEDIUM

Summer squash

Cucurbita pepo This vigorous plant blooms and fruits in summer, bearing squashes in a range of colors and shapes. Suitable for large pots, train plants vertically or leave to trail. Feed and water regularly; harvest squashes when they are small and tender.

‡↔3ft (1m)

ANNUAL/BIENNIAL MEDIUM

Long carrot

Daucus carota Sow seeds for this type of carrot throughout spring and summer. It can be harvested young and tender a few weeks after sowing or left longer to produce larger roots. Best planted in deep containers; water well.

‡24in (60cm) ↔10in (25cm)

ANNUAL/BIENNIAL SMALL

Short carrot

Daucus carota This type of carrot bears short, round sweet-tasting roots. Sow seeds directly in windowboxes and containers in spring and summer, and harvest once large enough, then re-sow new batches. Water regularly.

‡12in (30cm) ↔6in (15cm)
